Riucidation of a Mystery.—It is not an undue assumption that no beverage, whe ther medicinal or dietestic, has ever won so spontaneous a popularity and so entestic, has ever won so spontaneous a popularity and so entestic, has ever won so spontaneous a popularity and so entestic, has ever won so spontaneous a popularity and so entestinated that it is a solution of the solution of the solution.

"WOLFE'S AROMATIO SCHEDAM SCHNAPPS."

The fact is so unexampled as to considure a commercial
mystery which none but the manufacturer and those men of
solution to whom the article has been submitted for analysis,
are competent to explain. It is true, shat all who have
tested this improved Holland Gin, by personaluse, at once
perceive its unquestionable superiority to every other they
have known. Its incomparably refined flavor, fragrance and
delightful driftuseness as an invigorating cordial, wholly free
from any of the objectionable tendencies of interior liquors,
are immediately discovered and universally admitted, as
are also its inestimable medicinal properties, by the Medical
Feculty, who everywhere give it an emphatic preference

are also its inestimable medicinal properties, by the Medical Faculty, who everywhere give it an emphatic preference in all those cases for which the use of Holland. Gin is prescribed. But the obscurioal causes of this distinctished supricinity and ereference remain to be stated, and are briefly as follows:

1. It is manufactured at Schiceaun, in Holland, and exclusively in the factory of the proprietor, by processes and materials elsewhere unemployed and unknown.

2. It is proved, by the repeated snalysis of several emisent chemits, to be entirely free from the permissions fusified which remains in every other liquor distilled from grain, and which is the cause of the nervous dud visceral decreasement, serous corgestion, and morbid desire for habitual and intemperate indulgence, which such imporsinvariably tend to superinduce.

3. It is recoved by the same near the processing the state of the state of the superinduce.

M., proceed to the private rooms of Prof. Barnes, at Hum ford's Hotel, and there tested the truthfulness of sundry experiments represented to be by the agency of spirits, and after mardre dehiberation, make the following report:

First. That the physical force in moving, sliding and tipping tables, was nothing more than mechanical.

Second That the testing experiment promised in relation to spiritual force, physically, was refused.

Third. That the mental responses were in no instance correct.

Fourth That from the undue degree of mental excite Fourth. That from the nedue degree of mental excitement on the part of the mediums in the exhibition of what is purported to be Spiritual Manifestations, conditions of the nervous system abnormally occurred, which must in the nature of things if persisted in, produce a lamentable relation between their minds and bodies; and that nothing whatever was done but what we, who are not mediums, can and did perform by voluntary force.

That we look upon these supposed Spiritual Manifestations as being fraught with mental and physical induced which cannot be attended with the least good to the human race, but on the contrary, must cause the most diredul results apon many of those who may follow this delaxion, and give themselves up as seens for its promulgation.
